## Panel and Flush-Mount Metal Enclosure

### Streamlined Enclosure Increases Installation Flexibility

This streamlined enclosure for the DiaLog Elite alarm monitoring, notification and control system is designed to provide panel shops and integrators with an array of mounting options that saves them time and money. The metal enclosure coupled with the powerful capabilities and user-friendliness of the Elite saves you time on the installation and provides your customer with a superior product.

#### Key Features of the Metal Enclosure

- 12.5" H x 10.5"W x 5.0"D - mountable in virtually any size cabinet or on the wall
- Same brackets for flush or panel mount
- 180 degree access to internals whether flush or panel mounted
- removable wiring access door for large volume of wires
- 3/4" conduit knockouts on each side
- lockable latch for security
- powder-coated for durability and looks
- NEMA 4X window kit available

**Flush-Mount Configuration**  
The Elite's operator interface can be flush with the panel or protrude up to 1/8".

**Panel-Mount Configuration**  
Showing removable bottom access door for easy wire routing.
